# Encouraging fitness and health

Twickenham Project host community members who like to keep fit shared their healthy living secrets with *Platinum Times*.

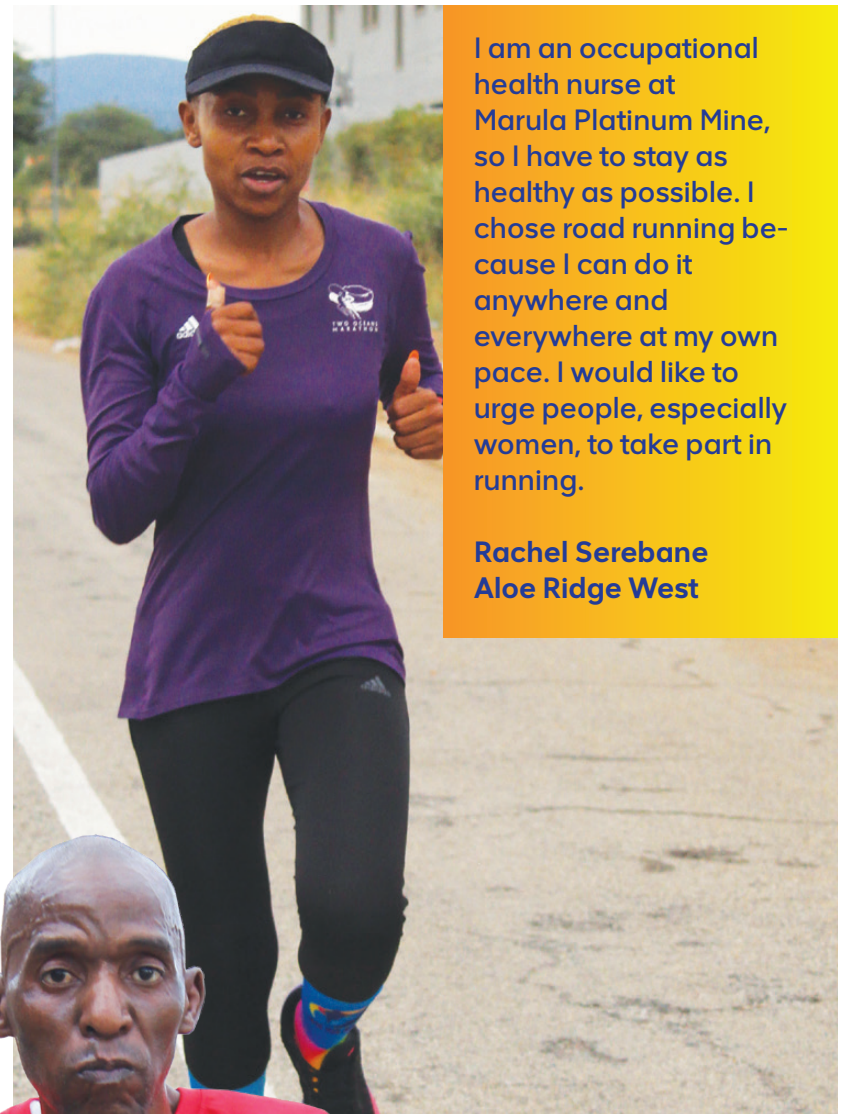

I am 62 years old, but I still run like a boy. I hit the road on foot whenever I get an opportunity to do so. Running keeps me healthy and active and I am currently preparing for my eighth Comrades Marathon. People should engage in sport to fight illnesses.

**Phineas Maphanga**  
Rivercross

I am 68 years old and I train three times a week with my husband. I do weights, fun walks/runs and aerobics. Exercise improves your health and keeps you agile. Participating in sport is therapeutic and promotes your physical and mental health. Longevity is one of the benefits of frequent exercise, so we should learn to work out as a family.

**Lorraine Mdluli**  
Burgersfort

I am an occupational health nurse at Marula Platinum Mine, so I have to stay as healthy as possible. I chose road running because I can do it anywhere and everywhere at my own pace. I would like to urge people, especially women, to take part in running.

**Rachel Serebane**  
Aloe Ridge West

I am a firefighter at Fetakgomo-Tubatse Local Municipality. I train and take part in marathons regularly so that I can do my job well and continue saving lives. No matter what your profession, I encourage you to participate in sport to stay active and healthy.

**Madifateng Choma**  
Burgersfort

I encourage individuals and families to consider engaging in sport to keep fit and healthy.

# Boosting health while having fun

Learning and education also happen outside the classroom, on the busy streets. Mogale Wa Bagale Technical High School made this clear by promoting health and fitness, raising awareness of social ills, and raising funds in Burgersfort.

To encourage families and the youth to engage in sporting activities and adopt a healthy lifestyle while also raising funds to build much-needed school infrastructure, Mogale Wa Bagale Technical High School collaborated with Anglo American Platinum and other stakeholders to host its first annual 10km fun walk/run at an event that also included aerobics and other activities.

Mogale Wa Bagale Technical High School principal Nakedi Mashiloane-Chaba and school governing body chairperson Knowledge Matlakala walked 10km to lead by example. Platinum sponsored energy drinks and bottled water for the walk/run to the school, which is situated in one of Twickenham Project's host communities.

Several regular road runners from across Limpopo participated, taking the opportunity to guide aspiring athletes and to prepare for the Comrades ultramarathon, which is set to take place from Pietermaritzburg to Durban on 11 June 2023.

Anglo American Platinum early talent learning advisor Sello Mphoko spoke at the event held on 15 April 2023, and emphasised the importance of good health, especially for learners who aspire to work in the mining industry.

He pointed out: "You have to be fit and in good health to pass the medical examinations that are necessary for you to take up a job opportunity in mining. Initiatives like this one will help learners to adopt a healthy lifestyle. We partnered with the school to make this initiative a success and we are happy that people came out in numbers to support it."

Educator Stella Mohlala, the event organiser, felt honoured that law enforcement officers took the opportunity to raise awareness of the negative social impact of teenage pregnancy and drug abuse by speaking at the event.

She expressed the hope that community gatherings such as this would help to motivate the youth to choose activities that promote good health rather than placing their lives at risk.

Mohlala pointed out that Mogale Wa Bagale is the only technical high school in Burgersfort, which places pressure on the school to build more facilities to promote science education and accommodate as many learners as possible.

She was pleased with the success of the event, which attracted more than 200 participants. Each person had to

pay a fee to take part in all the events lined up for the day.

She explained: "We had a 10km fun walk/run, aerobics and a massage booth. All of the participants received goodie bags containing various items from our sponsors, which included Platinum, and there were water points along the route to keep our runners hydrated."

Mogale Wa Bagale Technical High School principal Nakedi Mashiloane-Chaba and school governing body chairperson, Knowledge Matlakala both mentioned that they were overwhelmed by the attendance, energy and commitment displayed by the runners. The duo completed the fun walk and commented that education certainly does not end in the classroom, as they were motivated and guided by regular runners.

Event organiser Stella Mohlala and Anglo American Platinum early talent learning advisor Sello Mphoko also successfully completed the fun walk.

# Learners benefit from school improvements

The state-of-the-art school infrastructure worth more than R14.2 million donated to two Twickenham Project host community schools is set to improve learning outcomes in the Burgersfort area.

Four new classrooms to be used for early childhood development and a new administration block were handed over to Makgopa Primary School and a new administration block was handed over to Ntoampe Technical High School by the Bohwa Bja Rena Community Development Trust.

Bohwa Bja Rena Community Development Trust chairperson John Motimele highlighted that more than R9,8 million was invested in the construction of the administration block and four classrooms at Makgopa Primary School, which took 12 months to complete.

He added that the administration block at Ntoampe Technical High School was worth more than R4,4 million and took two years to complete because of the effect of the Covid-19 restrictions.

Each administration block includes a staff room, principal's and deputy principal's offices, a reception area, a sick bay and a counselling room, a kitchen, staff ablution facilities, and a store room.

Motimele also mentioned that more than 13 local contractors were hired for the construction of the buildings, the procurement of furniture and the other activities involved in completing the projects. He went on to stress that projects such as these grant communities the dignity they deserve

Limpopo Education MEC Mavhungu Lerule-Ramakhanya, Kgoshi Kopo Makgopa and Bohwa Bja Rena Community Development Trust chairperson John Motimele unveiled a plaque at Makgopa Primary School on 21 April 2023.

and added that the success of the projects depended on partnerships and the commitment of the benefiting schools and communities.

He concluded: "Projects such as these help to fulfil Anglo American Platinum's aim of creating sustainable communities beyond the life of mines, so that communities can continue to thrive even when no more minerals are being mined."

Anglo American Platinum principal, equity and empowerment, Shibu Mapheto explained that, in 2011, Anglo American Platinum launched Alchemy, a R3,5 billion community development and empowerment transaction. As a result, Platinum established the Lefa La Rona Trust as a conduit for the benefits of owning the shares involved in the transaction to its host

communities around Mogalakwena Complex, its Rustenburg operations, Twickenham Project and Amandelbult Complex via community development trusts dedicated to each of these communities, as well as a non-profit company to benefit its major labour-sending areas.

Lefa la Rona Trust chairperson Nana Magomola said the Lefa la Rona Trust was established to guide the wise use of the money generated by the shares involved in the Alchemy transaction. She stressed that communities need to approach the specific community development trust serving their area with any requests.

The Bohwa Bja Rena Community Development Trust is the development structure that benefits Twickenham Project's host communities.

Identical administration blocks were donated to Makgopa Primary School and Ntoampe Technical High School.

Makgopa Primary School principal Sello Manaka, Limpopo Department of Education MEC Mavhungu Lerule-Ramakhanya, Kgoshi Kopo Makgopa, Sekhukhune East education district director Papi Makola (back) and other dignitaries inspected the new administration block at Makgopa Primary School.

Lefa La Rona Trust chairperson Nana Magomola addressed attendees at the handover of the schools' administration blocks and classrooms.

"As businesses in Twickenham Project's host communities, we want to ensure that residents benefit as much as possible. We call on other stakeholders in the education industry to join hands with the trust to help to boost learning and teaching in schools by providing the necessary tools," said Twickenham Local Business Forum chairperson Abednigo Mashabela.

Mapheto said: "These two projects prove that Alchemy is indeed benefiting communities. Our trusts will do as much as they can for our mining communities, but we need other stakeholders to help us build sustainable communities."

more than 3,000 schools across the province and we need the help of partners such as Anglo American Platinum and the trust. We hope to have such state-of-the-art learning and teaching infrastructure at all our schools and I am sure this would be possible if more partners got involved."

Various stakeholders collaborated to improve the learning environment at the schools and the day-long handover ceremony was attended by traditional leadership, the Twickenham Local Business Forum and community engagement forum members, representatives of the Limpopo Department of Education, and officials serving the Greater Tubatse Local Municipality.

The trust and the Department of Education also collaborated to donate school uniforms to learners at the two schools who were in need of them.

Limpopo Education MEC Mavhungu Lerule-Ramakhanya thanked everyone involved in the projects and said: "The department has

# Applications for bursaries and scholarships are open!

Applications for Anglo American Platinum's 2023 higher-learning bursaries and scholarships opened on 10 May and will close on 15 June 2023. Our bursary scheme gives young professionals the academic background to pursue a career in the mining industry. You can apply online at [www.angloamerican.com/careers](http://www.angloamerican.com/careers). While our scholarship opportunities, reserved for host community learners, are open to any field of study. All applicants must have applied to a *bona fide* tertiary institution.

## STUDY OPTIONS

### 1 Bursaries

Learners from anywhere in South Africa can apply

We give preference to applications from our host community members

## What you need to know

### Applications are open to all South African citizens and must be made online.

Bursaries are available for tertiary studies at a university or university of technology for studies qualifying you to work in the mining industry, including practical training before and during your tertiary studies. We provide funding for four years of study. If your application is successful and you complete your four years of study, you will work back the bursary funding by joining the Platinum graduate development programme.

Answer all the questions and upload: Your certified ID document; a stamped/verified proof of residence from your traditional council or municipal councillor; your Grade 11 results, stamped by your school or, if you have completed Grade 12, a certified copy of your Grade 12 certificate. If you are a tertiary student, your latest transcripts and previous year's results; and a CV with all the relevant information.

## 2 Scholarships

Learners from Platinum host communities can apply

### What you need to know

Scholarships are available for any field of study. Applications are open to people from all our operations' areas of influence and must be made online.

If you receive a scholarship, you can complete your studies at any institution of higher learning in South Africa. Our scholarships provide funding for a full qualification and you do not have to work for Platinum to work back this funding.

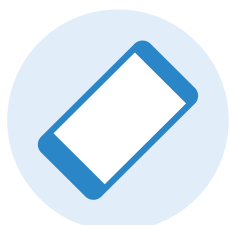

### Requirements

To be considered for a scholarship, you need to:

- Live in one of Platinum's host communities. You will need to submit a stamped/verified proof of residence from your traditional council or municipal councillor.
- If you are a Grade 12 learner, you must submit your Grade 11 results, stamped by your school, and provisional acceptance at a tertiary institution.
- If you are already a tertiary student, you must submit your 2022 results, stamped by the university, and pass all subjects you registered for in 2023.

# Prosperity-boosting projects approved

To promote co-creating thriving communities, key stakeholders received information about the projects that have been approved for Mototolo Complex's third social and labour plan (SLP 3) and are therefore set to benefit communities in its zone of influence.

The Mineral and Petroleum Resources Development Act (MPRDA) requires every mine in the country to have an SLP that clearly outlines how it will make a difference to local economic development, local procurement, human resources development and employment equity. Mototolo Complex is committed to co-creating SLPs that are transparent, inclusive and based on consultation with all relevant stakeholders.

The SLP 3 projects that have been approved for implementation in various Mototolo Complex host communities over the next five years were highlighted during a feedback session on 25 April 2023, which was attended by key stakeholders.

During the SLP 3 consultations, community members and other stakeholders, such as the Sekhukhune District Municipality, the Fetakgomo Tubatse Local Municipality, the Thaba Chweu Local Municipality, and the leaders of the neighbouring communal property associations, were asked to share their vision for their communities and to indicate what type of projects they believed would have the most impact. The approval of projects was based on the outcome of these consultations.

Mototolo Complex socio-economic development manager Tumisho Kekana highlighted that more than 100 projects were recorded, but only 20 were approved for inclusion in the complex's SLP 3.

He said, "We made sure we conducted thorough engagements with our communities to gain a clear understanding of priority projects. The SLP 3 projects that have been approved are mainly related to water

Department of Social Development Sekhukhune District director Veli Maphutha.

Mototolo Complex socio-economic development manager Tumisho Kekana provided stakeholders with an SLP 3 update.

Anglo American principal stakeholder engagement, Thabi Mathole provided clear explanations.

Anglo American Far Eastern Limb inclusive procurement specialist Nokulunga Nhlapho urged women and the youth to consider doing business with mines.

The acting municipal manager of the Sekhukhune District Municipality, Peter Mankga, raised questions and provided inputs during the SLP 3 feedback session.

and energy infrastructure, health and education, and roads and tourism, but there are some that are linked to Anglo American Zimele’s enterprise development programme, which aims to assist small businesses with skills and finance.”

During the session, it was shared that, in the first quarter of 2023, more than R3,7 million in contracts and purchase orders had been awarded to suppliers and enterprises who had benefited from Zimele’s programmes.

Kekana went on to emphasise that Anglo American Platinum has pledged to spend more than R220 million on the approved SLP 3 projects and plans to complete many important developments by 2025. It will do so through SLPs and through corporate social investment, with the

aim of achieving the United Nations Sustainable Developmental Goals by 2030.

He indicated that stakeholder engagements for the complex’s SLP 4 would start next year, while SLP 3 projects are in progress.

The attendees also received information on issues such as the Voluntary Principles for Security and Human Rights, grievance reporting channels and the appeals process, Zimele initiatives and inclusive procurement, including the procurement pipeline and vendor number application processes.

The full Der Brochen Mototolo SLP 3 is available for download at: [www.angloamericanplatinum.com/sustainability/our-communities](http://www.angloamericanplatinum.com/sustainability/our-communities).

Sekhukhune District Municipality local economic development manager Cleopas Nchabeleng stressed that all parties involved in SLP 3 projects should work together. He applauded Anglo American for continuing to support its communities and encouraged other companies also to help those who need it most.

Mototolo Complex Zimele hub manager Maphakiso Maesele explained the programmes that Zimele offers.

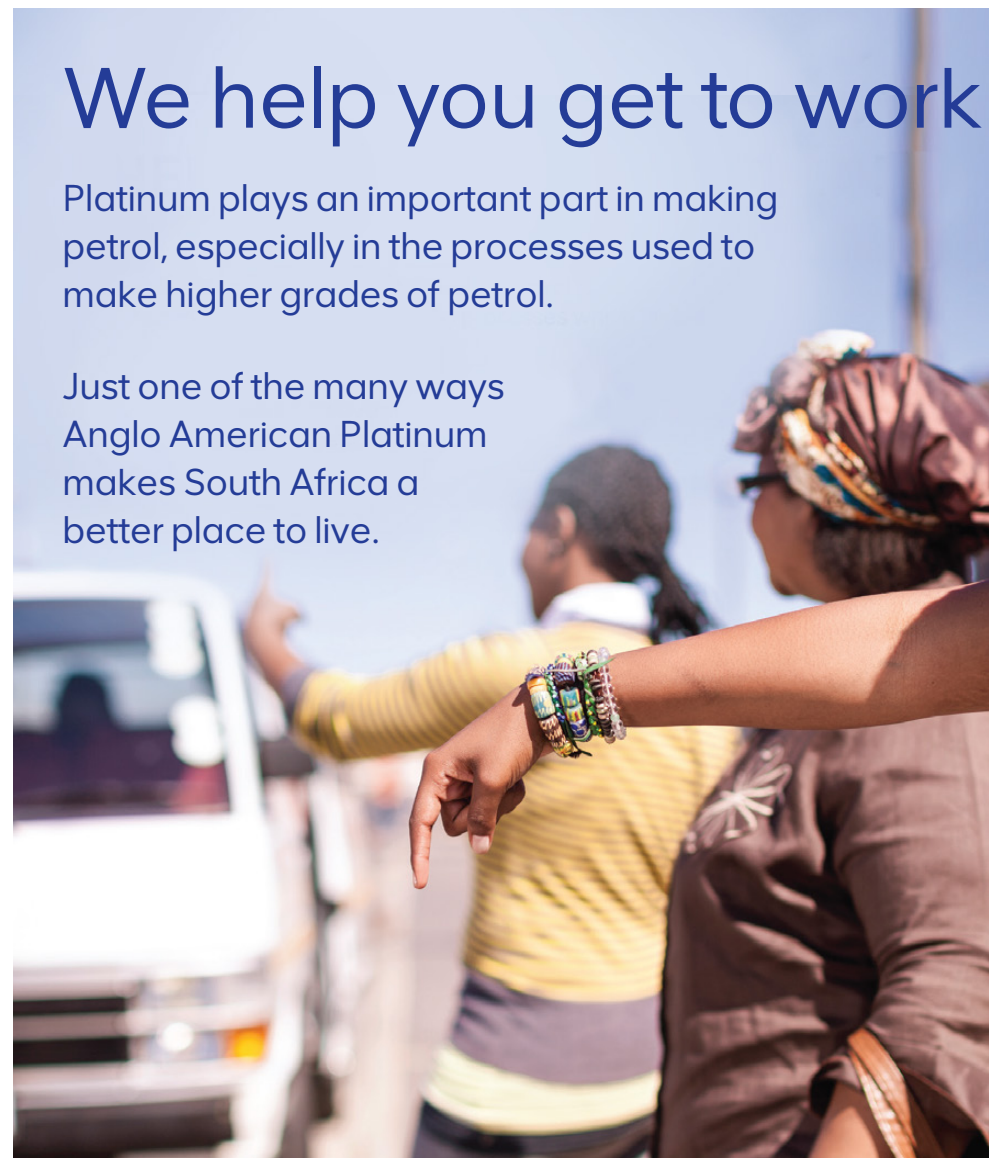

Mototolo Complex acting protection specialist Olivia Basson said people’s rights should not be violated in dealing with incidents and grievances.

Mototolo Complex social performance specialist Mandla Mathonsi highlighted the channels residents can use to report incidents and grievances.

This issue of *Platinum Times* also contains information on reporting grievances on page 11.
